

BIO END CAP

Features and Benefits

- Uniquely constructed 'pull' tab to ensure easy removal of the cap without damage to the ferrule
- 'Pull' tab design for strength but sufficient pliability to avoid damage to any materials with which it is in contact
- Permanent moulded lot number identification to ensure total traceability and prevent incorrect usage
- Part number, size, date of manufacture, lot number and statement of compliance printed on the packaging for ease of identification
- Produced from DMF listed polypropylene that complies with FDA and USP Class VI test protocols
